## TRAINING

### Continuous technological innovation

In an environment of continuous evolution and innovation, personnel skills are vital and represent a significant asset for any business.

To gain the maximum benefit from information technologies it is important to have to appropriate skills. LANexpert can help you acquire **the basic skills** on our standard training programmes, or update your skills with a customised course or value-added workshop.

Whether you are thinking about the strategic orientation of your **ICT services**, or you have a need for a **workshop specific** to a **new technology**, LANexpert can provide leading edge training for professionals and IT managers in each of its domains of expertise. In addition to customised training, LANexpert offers courses in co-ordination with its principal partners, which can lead to an **accredited certification**.

### Trainers who are experts in their domains

After more than 13 years working with many different companies, LANexpert has the background to offer training at the leading edge of technology.

All courses are taught by **engineers** based in Switzerland, accredited and certified to the highest level in their particular domains of expertise, and skilled in the process of knowledge transfer.

LANexpert trainers are constantly asked to put the content of their courses into **practical effect**. Many local companies have been able to enjoy practical proof of their expertise and will be happy to recommend them to you.

The objectives of LANexpert training's programs are to respond to the needs you have today and to **anticipate** the needs you will have tomorrow. We are always ready to work at your side, to implement your projects and to take on the challenges facing your company.

## ABOUT LANEXPERT

A Swiss company founded in 1995 and now based in Geneva, Lausanne and Zurich, LANexpert is a value-added integrator of services and solutions for information technology.

LANexpert transforms its customers' IT infrastructures into centres of value which enhance the global efficiency of the company.

## OUR MISSION

LANexpert's mission is to assist our customers in the analysis, implementation, usage and continuous improvement of their IT infrastructures, focusing on our core domains of networks and telecommunications, systems, storage and security of information. The ultimate objective is to **improve the customer's operational efficiency** by aligning **skills**, organisational methods, processes and information systems with the global strategies of the enterprise.

As well as offering standard or customised training programmes for all the technologies and products it supports, LANexpert assists customers in the precise deployment of new technologies, and in adapting existing infrastructures to their expectations and needs.

LANexpert also provides services and solutions for the management of IT services [ITSM] and project management [PM] allowing its customers to adapt their IT systems in line with their processes while maintaining the highest possible levels of **efficiency**.

LANexpert has the experience to provide the **highest levels** of professional cohesion, **know-how** and **competence**. Through their fundamental corporate values, LANexpert develops long-term relationships with its customers, suppliers and employees to create a **lasting, genuine team spirit**.

Our company and our experts are certified to the highest levels in the latest technologies in all our domains of competence.

## **CUSTOMISED TRAINING PROGRAMMES**

A customised training programme can be offered hand-in-hand with an IT project, transferring the knowledge that will allow you to use your infrastructure autonomously and with ease and competence.

Your personalised course can be conducted within your own environment or in a laboratory on the LANexpert premises. In order to provide the closest match with your expectations, LANexpert will select from its whole catalogue of courses those which best correspond to your training needs, then recast them into a programme tailored to your company. Certified and experienced trainers are constantly developing new courses and organising seminars on the latest information technologies. LANexpert can offer these courses at one of its training centres or in your own premises.

## **STANDARD TRAINING PROGRAMMES**

LANexpert offers standard courses for various market leading manufacturers and publishers, including Microsoft, Citrix and Vmware, which lead to accredited certification in co-ordination with these partners. LANexpert also provides training in IT governance, the management of IT services [ITSM] and project management [PM]. Please consult our catalogue of courses or contact our Training Business Development Manager directly.

## **TECHNOLOGY WORKSHOPS**

LANexpert organises seminars and workshops on specific subjects to provide an introduction to the latest technologies. These workshops have been designed to be very practical and functional. As always, they are delivered by field engineers who share their years of experience for the benefit of the attendees.

We look forward  
to meeting you  
one of our seminars  
or training programmes.

Please contact us  
for a quotation  
for tailor-made  
training.
