TRAINING

Continuous technological innovation

In an environment of continuous evolution and innovation, personnel skills are vital and represent a significant asset for any business.

To gain the maximum benefit from information technologies it is important to have appropriate skills. LANexpert Training Center can help you acquire **the basic skills** on our standard training program, or update your skills with a customised course or value-added workshop.

Whether you are thinking about the strategic orientation of your **ICT services,** or you have a need for a **workshop specific** to a **new technology**, LANexpert Training Center can provide leading edge trainings for professionals and IT managers in each of its domains of expertise. In addition to customised training, LANexpert Training Center offers courses in co-ordination with its principal partners, which can lead to an **accredited certification.**

Trainers who are experts in their domains

After more than 15 years working with many different companies, LANexpert Training Center has the background to offer training at the leading edge of technology.

All courses are taught by **engineers**, accredited and certified to the highest level in their particular domains of expertise, and skilled in the process of knowledge transfer.

LANexpert Training Center trainers are constantly asked to put the content of their courses into **practical effect.** Many local companies have been able to enjoy practical proof of their expertise and will be happy to recommend them to you.

The objectives of LANexpert Training Center are to respond to the needs you have today and to **anticipate** the needs you will have tomorrow.

We are always ready to work at your side, to implement your projects and to take on the challenges facing your company.

ABOUT LANEXPERT SA

A Swiss company founded in 1995 and now based in Geneva, Lausanne, Bern and Zurich, LANexpert SA is a value-added integrator of services and solutions for information technology.

LANexpert SA transforms its customers IT infrastructures into centres of value which enhance the global efficiency of the company.

OUR MISSION

LANexpert's mission is to assist our customers in the analysis, implementation, usage and continuous improvement of their IT infrastructures, focusing on our core domains of networks and telecommunications, systems, storage and security of information.

The ultimate objective is to **improve the customer's operational efficiency** by aligning **skills,** organizational methods, processes and information systems with the global strategies of the enterprise.

As well as offering standard or customized training program for all the technologies and products it supports, LANexpert Training Center assists customers in the precise deployment of new technologies, and in adapting existing infrastructures to their expectations and needs.

LANexpert SA also provides services and solutions for the management of IT services [ITSM] and project management [PM] allowing its customers to adapt their IT systems in line with their processes while maintaining the highest possible levels of **efficiency.**

LANexpert SA has the experience to provide the **highest level** of professional cohesion, **know-how** and **competence**. Through their fundamental corporate values, LANexpert SA develops long-term relationships with its customers, suppliers and employees to create a **lasting, genuine team spirit.**

Our company and our experts are certified to the highest level in the latest technologies in all our domains of competence.

CUSTOMISED TRAINING PROGRAMS

A customised training program can be offered hand-in-hand with an IT project, transferring the knowledge that will allow you to use your infrastructure autonomously and with ease and competence.

Your personalised course can be conducted within your own environment or in a laboratory in LANexpert Training Center premises. In order to provide the closest match with your expectations, LANexpert Training Center will select from its whole catalogue of courses those which best correspond to your training needs, then recast them into a program tailored to your company. Certified and experienced trainers are constantly developing new courses and organizing seminars on the latest information technologies.

STANDARD TRAINING PROGRAMS

LANexpert Traning Center offers standard courses for various market leading manufacturers and publishers, including Microsoft, Citrix and VMware, which lead to accredited certifications in co-ordination with these partners. LANexpert Training Center also provides training in IT governance, the management of IT services [ITSM] and project management [PM]. Please consult our catalogue of courses or contact our Training Business Development Manager directly.

TECHNOLOGY WORKSHOPS

LANexpert organises seminars and workshops on specific subjects to provide an introduction to the latest technologies. These workshops have been designed to be very practical and functional. As always, they are delivered by field engineers who share their years of experience for the benefit of the attendees.

We look forward
to meeting you
one of our seminars
or training programmes.
